# NC-PS

Extended nylon plug, with a special 4-sector expanding body geometry that allows for differentiated expansion depending on the type of installation material. Suitable for fixing profiles, windows, wooden and steel roofs, wooden strips, counterframes, ventilated walls, etc.

Conical inlet of the collar of the plug, allowing proper seating of the screw

Cone-shaped countersunk collar of the plug to ensure perfect fixing in line with

4 long lugs just under the collar preventing rotation of the plug and locking it inside base material

Special grooves and micro axial lugs for strong fixing and 4 guidelines for the screw all along expanding part

Expansion on 4 sides through saw tooth geometry and orthogonal channel along the body of the plug, allowing better fixing inside the hole

Conical insertion tip of the anchor taht facilitate the insertion into the hole
